# SEBO AIRBELT D1 Kombi and D4 Premium

The two AIRBELT D models are powerful, full-size, ultra-quiet, canister vacuum cleaners with three on-board attachments, a giant 1.5-gallon bag, an unmatched 40-foot cord and 52-foot cleaning radius, protective rubber-coated wheels, a durable telescopic tube with quick-release connections, and a full bag or clog indicator. They also feature excellent filtration, and a one-of-a-kind LED indicator that enables suction power to be optically monitored. A unique tapered suction hose with a 320° rotating canister connection increases airflow velocity, minimizes clogs, improves maneuverability, and its soft-foam bumper protects the vacuum, furniture, and walls from scuffs and scratches.

The D1 Kombi is a straight-suction vacuum that includes a combination nozzle, with retractable bristles, for use on hard floors and rugs. However, the D4's commercial-quality ET-1 power head cleans both carpets and hard floors, has excellent pet hair removal, provides manual brush roller shut off, and the extension side of its L-shaped contour makes cleaning under counters easy. A parquet brush for cleaning hard floors with straight suction is also included. The ET-1 has a 3.5-inch horizontal cleaning profile, tool-free brush roller removal, and automatic shut off due to brush roller obstructions. The D4's suction adjustment switch is located on its ergonomically designed handle, which also provides users effortless control of the power head's 180° steering ability.

**Flat-to-the-floor, 3½-inch Profile** – A low, cleaning-head profile makes reaching under furniture and beds easy!

**Three Full-size, On-board Tools** – A crevice tool, an upholstery nozzle, and a dusting brush are integrated into the canister body, so they are on-board and ready for use at all times. Also, many optional attachments are available.

**Full-size Canister Vacuum** – The AIRBELT D models are full-size canister vacuums that are larger, more powerful machines, offering a giant filter bag and an extra-long power cord.

**Unmatched, 40-foot Cord and 52-foot Operating Range** – Its cleaning radius is amazing! Large areas can be cleaned without changing electrical outlets. Plus, the seven-foot suction hose provides superb user and machine maneuverability.

**Control-switch Cord Rewinder** – Its super-long power cord rewinds by simply pressing a button.

**Full Bag or Clog Indicator** – When a full bag, clog in the airflow pathway, or an excessively dirty microfilter is detected, an indicator window turns orange and an airflow bypass valve opens. This prevents overheating and motor damage from a lack of adequate airflow.

**Durable, Rotating, Suction-hose Connection** – A brilliantly designed hose-to-canister connection allows 320° rotation of the suction hose, providing easier user movement and machine maneuverability.

**LED Suction-power Indicator** – This technology actually makes it possible for the user to optically monitor the vacuum's suction power. When using lower power settings, the LED light rotates slowly. When using higher power settings, the light rotates more quickly. When the power is set to standby mode, the light slowly blinks back and forth, left to right.

**Patented AIRBELT Bumper** – The soft, textile-covered, foam bumper protects furniture, walls, and the vacuum itself from incurring scratches and scuffs during use. The bumper also diffuses exhaust air, which contributes to its ultra-quiet performance.

**Four Rubber-coated Castor-wheels, Mounted on Bearings and Steel Axles** – The rubber-coated castor-wheels glide easily and gently over all floor types, providing exceptional maneuverability and protection of floor surfaces.

**Convenient Parking and Storage Aids** – After the work is done, the suction hose and telescopic tube, with parquet brush or combination nozzle, can be firmly stored on the canister's underside (shown) or backside housing.

**Giant, 1.5-gallon Filter Bag** – The large filter bag is convenient and economical because fewer bag changes are needed, and closing its built-in hygiene cap prevents dust from escaping during bag disposal.

**Three-step, Hospital-grade Filtration** – It features a pre-motor filter, a three-layer Ultra Bag, an S-class exhaust microfilter, and a tightly-sealed casing, which prevents dirty air from escaping through its seams.

## AIRBELT D1 Kombi

**Kombi Nozzle but No Power Head** – The D1 has a telescopic tube and suction hose without an integrated power cord, so it cannot accommodate an electric power head. Instead, it includes the straight-suction combination nozzle, with retractable bristles, to clean rugs and hard floors.

**Suction Adjustment Switch on Canister Body** – Because the D1 Kombi has a handle and hose without an integrated power cord, its suction adjustment switch is located on the canister body, not the handle.

## AIRBELT D4 Premium

**Durable Power Head with Manual Height Adjustment, Amazing Steering Ability, and Manual Brush Shut Off** – The D4 comes standard with the commercial-grade ET-1 power head, which is 12 inches wide, cleans both carpets and hard floors, easily removes pet hair, and offers four-level, manual brush height adjustment. To clean delicate rugs and hard floors with straight suction, the brush roller can be manually switched off. Its 180° steering ability provides amazing maneuverability.

**Easy Brush Roller Removal, User Warning Lights, and Automatic Obstruction Shut Off** – The ET-1 has easy, tool-free brush roller removal, a handy clog removal door, and a red warning light, with automatic shut off, for brush roller obstructions. Also, its warning light remains illuminated during use, when brush height is set too high for optimal cleaning, or when the brush roller should be replaced due to bristle wear.

**Suction Adjustment Switch on Handle** – The D4's suction power can be adjusted on the hose handle, so upholstery can be cleaned with stronger suction, yet curtains can be gently vacuumed as well.

# STANDARD FEATURES OF SEBO VACUUM CLEANERS

**Designed and Manufactured in Germany** – Legendary quality, reliability and performance make SEBO vacuums the first choice of cleaning professionals throughout the world.

**World's Best Pet Vacuums** – Because of superior power-head and brush-roller technology, SEBO vacuums are the world's best for pet hair removal!

**Excellent for Users With Allergies or Asthma** – The British Allergy Foundation recommends SEBO filters.

**Reliable, Commercial-grade Components** – All SEBO vacuums are constructed with thick, reinforced, ABS plastic, aluminum and metal parts, steel axles and bearings, and high-end, quality motors. Therefore, SEBO users own reliable, long-lasting vacuum cleaners. Competing vacuums are made with thin, flimsy, inexpensive, plastic materials, none of which are reinforced, and typically have useful lifespans of one or two years.

**Rubber Wheels and Soft Bumpers Protect Homes** – Smooth-gliding, rubber wheels protect hard floors and provide exceptional maneuverability. In addition, the bumpers that surround the power heads and the soft AIRBELT bumpers that surround SEBO's canisters protect furniture, walls, and vacuum housings from incurring scuffs and scratches during use.

**Advanced, Brush-Roller Technology** – SEBO's brush rollers are uniquely designed to funnel hair and debris into the power head's airflow channel, which improves vacuum cleaning performance on all flooring surfaces.

**Bagged vs. Bagless . . . Bags are Better!** – Top-fill, three and four-layer Ultra Bags are an integral part of SEBO's filtration system because they hold virtually all the dirt captured by the vacuum, which improves the effectiveness and useful life of the microfilters. They also ensure continuously strong suction because dirt enters from the top, deposits at the bottom, accumulates upward, and air exits through the sides, which allows unimpeded airflow as they fill to capacity. And they can be tightly sealed with a hygiene cap when full, so no dust can escape into the air during bag removal and disposal.

In contrast, without bags to hold nearly all the captured dirt, the microfilters on bagless vacuums quickly clog from excessive dirt build-up and must be replaced often, or a loss of suction and cleaning effectiveness will occur. In addition, dust and other allergens become airborne when emptying bagless dirt containers. Lastly, bagless vacuum microfilters are expensive, usually costing more than a multi-year supply of SEBO filter bags.

**Changing Bags is Easy and Clean** – SEBO filter bags can be changed in just a few seconds, and a hygiene cap keeps dust sealed inside during removal and disposal.

**Save Money! SEBO Vacuums Last for Years and Extend Carpet Life!** – If properly maintained, SEBO vacuums save ordinary, residential users hundreds of dollars, by providing excellent performance for ten to fifteen years or more, and their deep-cleaning, power-brush technology extends the life of carpets. Typical vacuums perform poorly, even when new, and usually do not last beyond two years. So six or seven "disposable vacuums" must be purchased during the average life expectancy of just one SEBO machine.

**Incredible Warranty Coverage** – All SEBO models include a FREE seven-year warranty on the motor and five-years on non-wear parts and labor charges.
